Career Objective:

An **AI Transformation Lead** and PMP®-certified operations leader with 20+ years of experience who now **designs, ships, and scales agentic AI systems that transform how businesses operate**. Architected and deployed four production multi-agent platforms—for lead intelligence, email-to-CRM automation, AI-driven sprint delivery, and geographic sales intelligence—using **Claude, Cursor, Vercel and modern full-stack engineering (React, NestJS, Next.js, PostgreSQL, AWS, CI/CD)**, cutting per-lead research time by 70% and project turnaround by 20%. Combines hands-on AI building with **\$1M+ P&L ownership, cross-functional adoption leadership, and Lean Six Sigma / Agile governance**. Seeking a remote AI Transformation / AI Enablement leadership role where I can embed into business functions, identify high-leverage use cases, deploy agentic workflows, and drive measurable, organization-wide AI adoption.

Profile & Strengths:

- **Agentic AI Delivery:** Architected and shipped four production multi-agent platforms (lead intelligence, email-to-CRM automation, AI sprint-delivery co-pilot, geographic sales intelligence) on Claude, Cursor, Vercel with React, NestJS, Next.js, PostgreSQL, Redis and AWS CI/CD.
- **AI Adoption & Enablement:** Embeds into Marketing, Sales, Engineering and Research functions to identify high-leverage use cases, author PRDs, deploy AI workflows, and train teams to adopt AI, Git and CI/CD—turning tool access into measurable, org-wide transformation.
- **P&L & Portfolio Accountability:** Directly manages diverse \$1M+ engineering portfolios, achieving measurable gains in cost optimization and top-line revenue growth.
- **Institutional Governance:** Expert in establishing robust frameworks, SOPs, and MIS dashboards based on CMMI and ISO standards to ensure global delivery excellence.
- **Product Lifecycle Leadership:** Bridges technical R&D with commercial outcomes, leading NPI projects from conceptualization through global manufacturing and product launch.
- **High-Stakes Stakeholder Engagement:** Accomplished in fostering collaboration between international teams, dealers, and government entities to align technical roadmaps with corporate goals.
- **Advanced Market Expansion:** Optimizes CRM systems and intelligent lead-generation engines (Zoho, Apollo, Pipedrive) to accelerate global market penetration and customer acquisition.

Professional Experiences:

Associate General Manager, Kohlex

Nov'18- Till Date

- **Operational Excellence:** Streamlined cross-departmental engineering workflows, reducing project turnaround time by 20% while maintaining strict compliance with ISO and industry safety standards.
- **Portfolio Oversight:** Managed a diverse portfolio of 28 engineering projects valued at \$ 1M, ensuring all milestones were met within scope, budget, and quality benchmarks.
- **Strategic Planning:** Collaborated with the VP and CEO to develop and implement annual Sales, business and operational strategies that increased departmental efficiency by 15%.
- Implemented **AI-driven** solutions across marketing, engineering, sales, and research—boosting revenue, reducing costs, and improving efficiency through automation and intelligent workflows.
- **Lead-Kohlex-AI — Intelligent Lead Management Platform:** Architected and deployed a multi-agent lead intelligence platform (React 18, TypeScript, NestJS, PostgreSQL, Redis) that integrates Zoho CRM via OAuth 2.0 and Apollo APIs to auto-classify companies as new, existing, or returning, enrich prospect profiles through web scraping, and surface priority-ranked leads to the sales team — cutting per-lead research time by over 70% and targeting a >15% lift in conversion rate.

- **Indeed Alert Automation — Intelligent Email-to-CRM Pipeline:** Engineered a multi-stage automated pipeline that ingests incoming job-posting emails, runs duplicate detection, role-keyword filtering, Google Maps geocoding, Apollo industry lookup, and ZenRows deep-scrape verification — routing only validated, sales-ready prospects directly into Zoho CRM and eliminating manual lead qualification entirely.
- **Kohlex AI Scrum — AI-Powered Delivery Intelligence Platform:** Designed and led development of a Scrum execution platform (Next.js, Node.js, PostgreSQL) featuring asynchronous daily stand-ups, AI-driven sprint planning with capacity modeling, blocker pattern detection, and risk forecasting — functioning as an AI delivery co-pilot that reduces team over-commitment and improves sprint goal achievement across distributed engineering teams.
- **Kohlex CRM Sales Mapping — Geographic Lead Intelligence:** Built a geographic sales visualization service (NestJS, React, Leaflet, PostgreSQL, Google Maps API) with heatmaps, geocoding, isolation detection, and week-over-week pipeline comparison — deployed to AWS ECR via GitHub Actions CI/CD — giving the sales team real-time territory intelligence to prioritize outreach by market concentration.
- Authored and optimized PRDs, built workflows, integrated AI into business operations, and trained teams to adopt AI effectively and make them use Git, CI/CD pipelines.
- Supervised and mentored high-performing teams as Scrum Master, ensuring successful Agile delivery while fostering collaboration and accountability.
- Analyzed US market lead generation and sales metrics using Zoho, Apollo, and Pipedrive; generated actionable insights to strengthen campaigns and customer acquisition.

Entrepreneur/ Freelance, ULTI Consulting Services

May'15-Nov'18

- **Spearheaded cross-functional digital transformation initiatives**, leveraging RPA to optimize workflows within Finance and E-commerce. Improved operational efficiency by **25%** (est.) through the deployment of scalable automation solutions across complex Web, Windows environments.
- **Architected the project governance framework** for a high-stakes large-scale transformation program (APCRDA). Developed comprehensive integrated schedules and process architectures using MS Project and Visio to ensure **alignment between multi-disciplinary stakeholders** and rigorous milestone tracking.

Strategic Project Manager, Harsco Rail

Jun'14- Dec'14

- **Operationalized the IGROW framework** to lead high-priority business transformation and growth initiatives. Partnered with Sales and Business leadership to diagnose systemic bottlenecks, define strategic objectives, and execute action plans that accelerated departmental performance.
- **Engineered strategic playbooks and "perpetual planning" models** for the Pooltas-Harsco Joint Venture. Established a dynamic performance-monitoring system for Asset Optimization projects, enabling real-time pivots and ensuring project alignment with long-term ROI targets in a fluctuating market.

NPI Project and Business Development Manager, Hinduja Tech

Mar'12- Jan'14

- **Spearheaded multi-million-dollar digital and product transformation programs**, including the Next-Generation Drilling Tool (Halliburton) and Orbis Collective System (Covidien).
- **Designed and institutionalized offshore project frameworks** and maturity models based on CMMI and ISO standards, significantly improving delivery predictability and compliance for global energy projects.

Project Manager, Chant Engineering, PA, USA

Jul' 09- Feb'12

- Spearheaded the Hydraulic Business Unit's P&L and strategic expansion, optimizing multi-million dollar US Defense projects through rigorous cost analysis, vendor orchestration, that maximized delivery efficiency and risk mitigation.

Sr. Product Development Engineer, Danaher, Altoona, PA, USA

Dec'08- Mar'09

- Led certification program for gas dispenser vapor recovery valve—planning, testing, and compliance tracking.

Business Development / Six Sigma H&HS Engineer, Caterpillar, IL, USA

May' 05- Nov' 08

- Design liaison and startup/troubleshooting for Motor Graders; managed NPD hydraulic components projects using structured PM practices.

Unigraphics Designer/Drafter, Sino Swearingen, San Antonio, TX, USA

Apr' 05- May' 05

- Responsible for Engineering order (EO) program for commercial aircraft systems using Unigraphics NX-2.

Design Engineer, Advanced Heat Transfer (HVAC), Memphis, TN, USA

Jan' 05- Mar' 05

- Leading the Design of HVAC Housing Box program.

Research Assistant, The University of Memphis

Jan' 03–Dec' 04

- Responsible for managing Housing and Residence Life Dept website and Wireless network programs.

Quality Control Apprentice, Bharat Dynamics Limited

Apr' 02- Jan' 03

- Responsible for setting and performing final Quality control of Aerospace and missile components.

Education:

o **Master of Science in Mechanical Engineering**

Dec'04

The University of Memphis, Memphis, TN

o **Bachelor of Technology in Production Engineering**

Jun'01

Jawaharlal Nehru Technological University (JNTU), India.
